

/Users/sandrews/SSA  
/software/Smoldyn/github  
/Smoldyn/source/libSteve  
/RnSparse.h

```
graph TD; A["/Users/sandrews/SSA  
/software/Smoldyn/github  
/Smoldyn/source/libSteve  
/RnSparse.h"] --> B["stdlib.h"]; A --> C["stdio.h"];
```

The diagram illustrates a file dependency structure. At the top, a large gray box contains a list of file paths: /Users/sandrews/SSA, /software/Smoldyn/github, /Smoldyn/source/libSteve, and /RnSparse.h. Two blue arrows originate from the bottom of this box, pointing downwards to two separate, smaller gray boxes. The left box is labeled 'stdlib.h' and the right box is labeled 'stdio.h'. This indicates that the file at the top path depends on or includes both 'stdlib.h' and 'stdio.h'.
