

`std::exception`

```
graph BT; MyException --> std_exception[std::exception]
```

The diagram illustrates an inheritance relationship between two C++ exception classes. At the bottom is a gray rectangular box labeled 'MyException'. A blue arrow points vertically upwards from the top center of this box to the bottom center of a white rectangular box with a black border at the top, labeled 'std::exception'. This indicates that 'MyException' is a derived class that inherits from 'std::exception'.

`MyException`
