

detail::object_api
< handle >

handle

object

```
graph BT; object[object] --> handle[handle]; handle --> detail["detail::object_api<br>< handle >"]
```

The diagram illustrates a three-step vertical flow. At the bottom is a gray rectangular box labeled 'object'. A blue arrow points upwards from this box to a white rectangular box labeled 'handle'. Another blue arrow points upwards from the 'handle' box to a larger white rectangular box at the top, which contains the text 'detail::object_api' followed by '< handle >' on the next line.
